A Description of the 4 Quarters of the Year; and 1st of Winter.
Sol in Capricorn, Aquarius, Pisces.

ACcording to the Custom of Writers in this kind, *Winter* quarter is the first quarter, which took beginning the 10th day of *Decemb.* at which time the Sun enter'd into the first degree of the cold and dry Sign *Capricorn*, being the most remote from us, in his farthest *South* Declination, causing the Days with us to be shortest, and the Nights longest. This quarter continues until the Sun hath slowly passed thro' *Capricorn, Aquarius & Pisces*, & doth naturally resemble *Old Age*.

Of the Spring. Sol in Aries, Taurus, Gemini.

THIS quarter takes beginning near the 10th of *March*, at which time the Sun entereth into the first minute of *Aries*, making equal Day and Night; and continues while the Sun is passing through *Aries, Taurus*, and *Gemini*. This quarter doth resemble growing Youth.

Of Summer. Sol in Cancer, Leo, Virgo.

THE Summer quarter doth take his Beginning when the Sun enters into the first degree of *Cancer*, which will be this Year on the 10th of *June*, and continues whilst the Sun passeth through *Cancer, Leo, Virgo*. Now the Days are longest, and the Air hottest; therefore, but for necessity, bid Physick adieu.

Of Autumn. Sol in Libra, Scorpio, Sagittarius.

AUtumn, or Harvest quarter (commonly called the Fall of the Leaf, of some the latter Spring) begins when the Sun enters into the first degree of *Libra*, again making the Day and Night of equal length, which will be this Year the 12 of *September*, and continues while the Sun passes thro' *Libra, Scorpio*, and *Sagittarius*. This quarter doth fitly resemble Declining Age, and Phlegmatick Complexion.
